

# Handi *Vers* *Horizons*

# *Leisure for all*

Sharing the love of the journeys, the leisure activities and the culture, we wish to make discover to the disabled persons in particular, but also to all the curious and enthusiasts, diverse horizons.

We indeed make the report that the disabled persons are very often excluded from it due to the lack of means, of information, and accompaniment but certainly not due to the lack of envy!

## *Facilitate the access of the disabled persons*

Our objective thus is to propose cultural outings and journeys adapted to most of us, and to share the experiences of some and the others.

We also want to participate in the collective actions against the discriminations, so that the disabled persons have the same rights in access for the leisure activities.

## *Our first Project*

### *Not anywhere: in Bali*

- Put the experience and the quite recent journey of Alain 'in scout' in the service of the least valid by being their guide to make them discover Bali in December or in January with an adapted program but far from being disinfected! (Available on our site).

The support of an agency of adapted transport, **Bali Access Travel** for the organization on the spot, and of a french agency **TRACES** for the reservation of the plane tickets and the insurance, were indispensable to us.

### *Object of*

#### *Handi Vers Horizons*

*Promote the idea that the disabled persons, whatever their handicap, have the right to have access to other horizons, in the field of leisure, of culture, of journeys and to help them there.*

*Support, encourage, prepare and implement collective projects of leisure activities, access to the culture, journeys including abroad for its members.*

*Share the experience of some and the others to inform, accompany, and open new horizons.*

*Fight the discriminations connected to the handicap in the field of the leisure activities, of the culture and of the journeys in particular.*

- Facilitate the discovery of Bali and its very rich and unique culture, its temples and its magnificent landscapes, its delicious cooking, the warm contact with its inhabitants and its harmonious, sophisticated way of life influenced by the Balinese-like Hinduism concerned by the preservation of cosmos balance...

- Help financially the persons most heavily handicapped " to go towards other horizons ". We shall take care of all or some of the expenses due to the necessity of having an auxiliary of life to accompany them, thanks to our active search for donations and subsidies.

- Make the four hotels of the circuit much more accessible, by having some small adaptations made on the spot at first: inclined plane for one or two stairs. The forward idea would be to create a label Handivers Horizons so that the handicapped travelers can travel more serenely, even solo.

## *To support us*

### *The means to use*

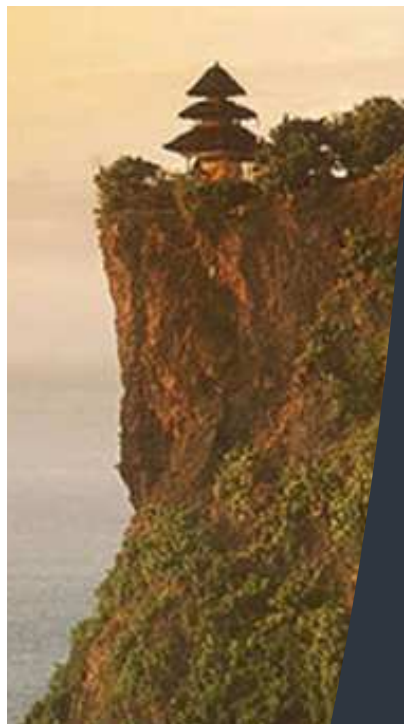

- By joining us by a membership(support)

- By donating , to allow disabled persons to leave (fiscal receipt)

- By spreading the information about this new dynamic association to other handicapped persons

- By informing us about discriminations in the domains which are ours

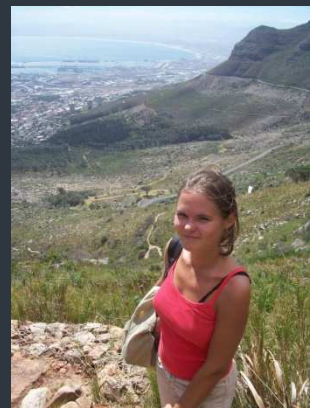

- By proposing cultural ideas, addresses, here or somewhere else, which we shall share to all...

*Alain Comoli*

Big traveler for more than 25 years, I visited during several months about forty countries. It is not our driving, sensory, psychic or mental limits which have to prevent us from going to see somewhere else; nothing is impossible!

Associative activist " handicapist ", fighting the discriminations and the exclusion of which we are the object, I wish to put into practice the principle of peer's emulation.

*Annabelle Didier*

During my studies in business school, I followed a part-time training within an association of development aid, for which I occupied the posts of treasurer and leader of a project in India.

I also made a training course of one year for an Indian NGO( ecological toilets), and an exchange of six months in South Africa.
